

House/Business Alarms Scope of Servicing Document

Included in your Service visit:

- Talk to the customer re any issues encountered with system since last visit and answer any questions they may have.
- Check mains and stand – by power supplies including charging rates
- Check 100% of equipment devices to ensure correct operation
- Check control panel for correct operation
- Check and test remote signalling equipment
- Check all internal and external sounders for correct operation
- Check operation of remote operating keypads

The Hall Alarms Engineer will leave a full service docket following the service to each system. Any recommendations will also be noted for the customer.
